

WIT 7/24/2017 - Updates

The **WIT** is tasked to implement the website. The scope of work of the WIT also includes setting the servers and executes a seamless transition to the new site from the existing current site.

Servers:

The production server is ready to go

The stage server is ready to go

CMS

The exact version of the CMS is installed on all servers.

The CMS is kept up to date on all servers.

Website Development

The WIT is developing a style guide and the theme of the new site. The details of the work and the assigned tasks is documented in Basecamp.
